## FEATURES & BENEFITS

### **It's Completely All-natural**

Made from premium organic ingredients, our fertilizers are free from chemicals and synthetic materials.

### **It Slowly Releases the Nutrients**

Made from alfalfa, our fertilizers release nutrients slowly over time. This slow-release feature ensures a steady and sustained supply of plant nutrients.

### **It's 100% Safe for Animals & Humans**

Free from synthetic chemicals and harmful substances, our fertilizers are environmentally friendly, beneficial insects, and safe for use around children and pets.

### **It Contributes to Long-term Soil Health**

Improves soil health, resulting in better plant growth, reduces the risk of diseases, and promotes resilience.

### **It Reduces Chemical Dependency**

An alternative choice for those wishing to reduce or eliminate chemical fertilizers, contributing to a more sustainable and eco-friendly approach to soil and healthy plants.

### **It Enhances Root Development**

Contains essential plant growth hormones and vitamins that promote root development, allowing plants to access water and nutrients, leading to healthier growth.

### **It's Packed with Nutrients**

Our fertilizers contain natural nitrogen, an essential nutrient for plant growth and crucial for promoting healthy foliage and overall plant development.

### **It Makes Your Soil Healthier**

Improves soil structure and enhances its ability to retain water and nutrients. The organic matter in the pellets improves soil aeration and drainage.

### **It Increases Microbial Activity**

Encourages beneficial microbial activity in the soil, vital in breaking down organic matter into plant-available nutrients, fostering a healthy soil ecosystem.

### **It Improves the Health & Quality of Your Plants**

The balanced nutrient content supports robust plant growth, leading to healthy, more vigorous plants, with improved yield and assists with the resistance to pests and diseases.

### **It Promotes Biodiversity**

Organic gardening promotes biodiversity by supporting diverse beneficial organisms in the soil and surrounding environment.

### **It Sequesters Carbon from Our Atmosphere**

The alfalfa forage used to create our products contributes to a cleaner environment by sequestering carbon throughout its growth cycle.

**Alfalfa Green Organic Fertilizers** produce and process premium alfalfa pellets as slow-release fertilizers and soil amendments. Certified organic by Ecocert Canada and environmentally sustainable, we are incredibly proud that all our products comply with Canadian organic crop production standards.

Our team farms thousands of acres of alfalfa near Norquay, Saskatchewan, in the beautiful Canadian prairies.
